

## Patient Information

What to bring to Turning Point

- Comfortable and season appropriate clothing (laundry facilities available for patients to use)
- Toiletries and personal hygiene items
- Cash (approximately \$50) to purchase snacks, cigarettes, etc. from our patient store

Items **NOT** allowed at Turning Point

- Electronic devices, cameras, cellphones
- Weapons or sharp objects

Storage space is limited. Please do not bring excessive amounts of clothing or personal items. Patients are responsible for any baggage charges.

## Visitation

Patients can receive visitors on Saturdays (except the first Saturday following date of admission). Visitors attend the Family/Friends Support Program from 12:30pm-2:00pm, then visit with the patient until 4:30pm. Visitors under the age of 12 require prior approval from Turning Point clinical staff.

Turning Point, a psychiatric and chemical dependency treatment center, is located in a beautiful and tranquil area of South Georgia. Our treatment environment includes specific programs for:

- **Detoxification and Rehabilitation**
- **Psychiatric Disorders**
- **Partial Hospitalization**
- **Intensive Outpatient Treatment**
- **Family Education and Counseling**
- **Patient Referral/Placement**

Turning Point staff have extensive training and expertise in both addiction and psychiatric disorders, so patients who are dually diagnosed will be treated by professionals who are not only caring and compassionate, but are also experts in the field.

The clinical team at Turning Point consists of: board certified psychiatrists, internal medicine physicians, social workers, counselors, nurses, and mental health technicians. This team works closely with Discharge Planning staff to provide an integrated and comprehensive treatment experience while at Turning Point.

Throughout our chemical dependency programs, men and women reside and receive treatment in separate facilities. This helps our patients feel more secure and frees them from the hesitation often experienced in mixed-gender groups. Males live in our main facility and the women reside in our women's lodge, also located on the main campus. All patients share semi-private rooms.

We also provide treatment for dialysis dependent patients. These patients receive the same level of psychiatric and chemical dependency services, and our program can be extremely effective for those desiring to qualify for an organ transplant.

## Psychiatric Program

At Turning Point our priority is to provide a safe and respectful treatment environment that allows patients to recover from acute episodes and improve their functioning while maintaining their dignity.

Our psychiatric program provides stabilization and treatment for patients suffering from psychiatric disorders. We are approved by the State of Georgia as an Inpatient Psychiatric and Emergency Receiving and Evaluating Facility.

## How to make a Referral

Simply call our Intake & Admissions Department  
**1-800-342-1075**

where our trained and experienced staff will guide you through the referral process quickly and easily.

## Inpatient Detoxification & Rehabilitation

Detoxification is approached by using the most effective medications available to help reduce the uncomfortable and unpleasant symptoms of withdrawal that often prevent patients from seeking treatment in the first place. Once the detoxification process is complete, the patient moves to the next step in our continuum of care, Inpatient Rehabilitation. Here, individualized treatment is continued and group therapy, training sessions and 12-step meetings are incorporated.

## Partial Hospitalization Program (PHP)

Turning Point's Partial Hospitalization Program provides patients with a controlled environment where they can continue treatment for a more successful outcome.

Like the inpatient program, patients reside in semi-private rooms and all meals are provided. Patients are monitored on a 24 hour, 7 day basis by medical professionals.

## Intensive Outpatient Program (IOP)

The IOP is designed to provide longer term treatment to help patients break the cycle of relapse. Our goal is to offer best practice treatment in the context of a therapeutic community. Persons likely to be successful at this level of care are those who do not require an inpatient setting but would be at high risk of relapse without intense therapeutic support.
